Site storeman/woman responsible for overseeing and issuing Personal Fall Protection Equipment (PFPE) to employees on site and/or are required to undertake equipment inspections and examinations, maintenance requirements, general management and disposal ensuring only fit for purpose work at height equipment is used.

Course information

Overview

As detailed in the Working at Height Regulations 2005 (Regulation 12 (3)) employers have a legal duty to ensure all Fall PFPE is inspected at regular intervals. The PFPE Inspector course is designed to give those responsible the necessary training and instruction on the control, management and examinations of the equipment to ensure it is safe to use and suitable under the manufactures guidelines during its life span.

Course Content

Learners attending our PFPE inspector course will be provided with the necessary information and knowledge in:

- Legislation and guidance as identified by the Work at Height Regs, PUWER, LOLER and INDG/HSE guidance notes
- Understanding of standards, CE and instructions
- Safe marking of equipment
- Inspection record production & keeping
- Understanding of manufacturer date coding, shelf life and function testing
- Knowledge and inspection methods for textile, metals, plastics and hardware associated with PFPE
- Inspection procedures for equipment such as harnesses, connectors, lanyards, SRLs and more...
- Fault diagnosis and quarantine procedures
- Controlled disposal procedures
- Limitations of inspections and manufacturer service recommendations
- Equipment care

On completion of training successful candidates will be able to implement a programme of periodic inspections for equipment used during work at height such as harnesses, lanyards, slings, karabiners, helmets, ropes

Learner Numbers

In order to ensure the interaction between the learners and the tutor is spread evenly and effectively, the maximum number of learners allowed on a course is eight.

Assessment

Multiple choice theoretical test
