

Confined Space Entry (2 Day)

Accreditation	ESS Certificate
Course duration	2 Days
Certificate valid for	3 Years

Who should attend

This is an essential training course for operatives who carry out or intend to carry out work in confined spaces. This 2 day course also covers the use of full breathing apparatus, for use when the air in a confined space is known not to be breathable.

Course information

Overview

The course is designed for the delegates to acquire basic Confined Space knowledge through classroom-based training and a practical assessment.

Course Content

- Current legislation
- Hazard identification
- Equipment selection
- Permits to work
- Safe working procedures
- Hygiene
- Gas detection
- Use of oxygen escape sets
- Accident and emergency procedures

Learner Numbers

In order to ensure the interaction between the learners and the tutor is spread evenly and effectively, the maximum number of learners allowed on a course is twelve.

Assessment

Multiple choice question paper.

Certification

Successful learners will be awarded an Essential Site Skills Confined Space Entry certificate valid for 3 years.

More details

What is a confined space?

A “confined space” is considered as any space, of an enclosed nature, with a reasonably foreseeable, specified risk of Fire or Explosion, Overheating, Bad Atmosphere, Drowning or Free Flowing Solids.

In most cases, a confined space is just large enough for people to enter and work inside. But the entrance and exit is severely limited and therefore space inside is not made for spending long lengths of time in.
